What is Truckers' GL:

[Truckers' General Liability](#) is a casualty policy specifically designed to meet the common needs of the trucking business for owner operators and motor carriers. It covers the liability exposure of business activities not related to the operation of your truck. Truckers' GL is for any commercial trucker who is a trucker for hire which has a physical address for its business.

Truckers' General Liability covers:

Your "premises and operations" which means your shop, yard and entire operation, as well as when you and/or employees are away from your premises and are in the course of conducting work-related operations. It DOES NOT cover transportation exposures as these are insured on your commercial automobile policy.
